

2017 Department of Biology Awards

JAMES MOHR SCHOLARSHIP

Tyler Dahl, Biology

My name is Tyler Dahl. I was born and raised in Helena, Montana and came to Utah State 2 years ago this August. I am currently a junior in school and am studying Human Biology. After finishing my undergrad program, I plan to go to medical school where I want to go into surgery or specialize in research geared towards understanding new illnesses. I am currently working at the Institute of Antiviral Research where I work mostly with the Zika virus under Dr. Craig Day and Dr. Justin Julander. I am currently a member of the pre-med club, and previously was in the leadership for Operation Smile at USU on campus. Outside of school, I love everything outdoors. Fishing, hiking, camping, and playing basketball with friends are some of the things I enjoy.
