

2017 Department of Biology Awards

JOSEPH E. GREAVES ENDOWED SCHOLARSHIP

Eliza Long, Biology

My name is Eliza Long, and I am a sophomore majoring in cellular/molecular biology. I have always had a love for science, specifically related to living things, which is why I chose to major in biology. So far, I have managed to maintain a 4.0 GPA. I also volunteer in Dr. Gilbertson's Lab here on campus which I enjoy doing every week, and feel fortunate to be able to participate in and learn from other students and faculty.

My ultimate goal is to go to medical school and become a doctor. In high school when I took my first anatomy and physiology class, I found the human body fascinating and intriguing, and I knew that's where my passion was. I am specifically interested in studying oncology and infectious diseases.

When I am not doing school work or lab work, I enjoy hiking, running, and spending time with my family and friends.

I am very grateful and honored to be the recipient of the Joseph E. Greaves scholarship. Thank you to the Joseph E. Greaves family for their generosity in providing this scholarship.
