

THOMAS L. BAHLER SCHOLARSHIP

ALEXANDRIA HAYDEN CAMPBELL
BIOLOGY, SENIOR

A few things about me:

Next year, I will start my fourth year at Utah State University majoring in Biology with an emphasis in cellular/molecular biology. I am looking forward to continuing on to my senior year. During my time at USU, I have worked in the research labs of Dr. Beth Neilson at the Utah Water Research Laboratory, and Dr. Michelle Baker in the Department of Biology. I have also completed an undergraduate research project under these two professors and have presented my findings at the National Conference for Undergraduate Research. I have been an Honors student since my Freshman year, and plan to graduate with Honors in Biology in the Spring of 2015. During the summer of 2013, I participated in a summer research program under the iUTAH (innovative Urban Transitions and Aridregion Hydro-sustainability) project. Throughout my college career, I have also had the opportunity to participate in intramural sports including dodge ball, flag football, basketball, and ultimate frisbee. I am also a volunteer for Rocky Mountain Hospice, where I have been able to learn about patient care. After graduation, I plan on attending medical school.
