

*DAVID B. DROWN SCHOLARSHIP FOR PUBLIC HEALTH*

**RADDISON VEATER**  
PUBLIC HEALTH, SENIOR

A few things about me:

I will be a senior next year at Utah State University and have spent the last few years earning a degree in Public Health with an emphasis in Industrial Hygiene. Cache Valley has provided ample opportunities to get involved with the community. My first three years in Logan I worked as a CNA to pay for my college expenses. During this time I fell in love with the elderly and gained an utmost respect for what they go through. I have made several friends throughout the community through volunteering with a variety of organizations. Three of my favorite include the after school program TEAM (Together Everyone Achieves More), Logan Regional Hospital, and Access Homecare and Hospice. I have had great experiences that have helped along the way: undergraduate assistant (UA) of Human Physiology labs and being president of the Pre-SOMA (Student Osteopathic Medical Association) club. Currently, I am doing research under Dr. Scott Bernhardt researching Bartonella prevalence in fleas isolated from populations of Uinta Ground Squirrels in Logan Canyon. I am looking forward to summer where I will again work for Nucor as a Health and Safety Intern. I am excited to graduate the spring of 2015 and look forward to the opportunities ahead.
