

*Thomas L. Bahler Scholarship*

**Jacob Blotter**

Biology (pre-medical), Junior

A few things about me:

I grew up knowing I wanted to do something in the health profession. I've always loved biology and learning about how the body works. As a junior, I've had an opportunity to study lots of chemistry and biology, but my favorite classes have been anatomy and physiology. I was able to perform research in a neuroscience lab, where I worked with mice and experimented with learning and memory. I am currently a member of this year's Science Council, as well as the Honors Program. I have earned an A pin from the University for a 4.0 GPA, I was a finalist for the Bill E. Robins Award, and I am the Honors Program's Undergraduate Teaching Fellow of the Year this year. After I graduate, my plan is to attend medical school and become a health professional. During my career, I would love to be involved with medical trips to various places in the world that are in need. This scholarship will help me take more steps in the direction of my goals and dreams. Applying to multiple medical schools and attending interviews in various locations will require substantial funds, and I plan on using this scholarship to finance these expenses. I am most grateful to be this year's recipient of the Thomas L. Bahler Scholarship.
