

This class incorporates online lectures and electronic homework activities and readings with engaging interactive class activities.

Students will watch online lectures, review textbook material, and do online homework outside of class.

Course Objectives

The objectives are in the text at the beginning of a new section in each chapter.

The course is designed to introduce you to and provide basic skills and resources that will aid you in your medical employment or profession. The objectives of the lectures and labs are intended to help you learn the basics of microbiology, and understand the role and influence of microbes on our health, our environment, and everyday lives. Our goal at the end of the course is to help you:

- Appreciate the role of microbes in the environment and our economy.
- Understand microbial metabolism both aerobic and anaerobic.
- Understand growth requirements for microbes and methods of controlling growth of those microbes.
- Understand the role of adaptation of microbes to different environments and exposures.
- Know the basics of characterizing and classifying species.
- Understand in part how microbes affect our health.
- Understand in part how the body defends itself against microbes and disease.
- Be proficient at aseptic technique and in microscope use.
- Be able to speak in front of the class and present a topic of research

We hope that we can inspire you and prepare you better as a public or private health care worker, by being informed and, able to understand disease, and transmission of disease.

It is your responsibility to work on LearnSmart and ConnectOne Chapter Homework assignments regularly. This is intended to help you prepare for exams.

The lab portion is intended to give a hands on training and visualization of lecture materials presented in class. It is a lab. You are expected to practice critical thinking skills, and work out the lab with some forethought. I will not be giving you a recipe card of instructions and telling you what to do, and when and how to do it. You will learn to use the compound light microscope, prepare smears, use of stains and indications, aseptic technique. You will gain insight into size, characteristics, needs of microbes, where they survive, how they are controlled, and their roles in our complex society.

Study and preparation

This course includes a lot of new terms, names, classifications, techniques, concepts and terminology that must be mastered to be successful. I would recommend time studying your text. Use the reviews in the lab manual and text at the end of the chapters for studying. The best way to learn is read before class, then the next day review what you learned in class. Spending time reviewing with others is important and helpful.

Websites www.masteringmicrobiology.com

You can go online and use the tutorial resources available with your text.

Canvas website at : <https://bb.usu.edu>

You may go on canvas and look up tutorials, help and support.

Laboratory

Spend a little time before class and lab to review the learning objectives and protocols, to be prepared for the short time available in the lab. There are things that require time, and need to be prepared early in the lab in order to be done by the end of the lab. The data sheets in the lab manual will be turned in for grades. Take your time and fill them out and answer the questions with as much detail as possible. Remember this is for your education not mine. If you need help, ask!

Student Presentation

Each student is required to submit a written and provide an oral presentation of their research on an infectious disease. Report expectations and grading criteria will be provided. The written portion of the report will require a visit to the writing center. The oral portion of the assignment will be a power point presentation to be presented the last week of class. This is not for a burden, think of reasons why we might ask for this to be done, and how it will make you a better health care provider.

Grading

Grades will be mainly from your test and lab quiz scores and lab data sheets. The letter grade is based on the percentage of total points earned on all the exams, lab quizzes, paper and student presentation. No extra credit, special projects, sympathy ploys, etc. to improve your grades. (This is an example grid)

<u>Points earned</u>	<u>Percentage of points earned</u>	<u>Grade</u>
555-600	93-100	A
537-554	90-92	A-
513-536	86-89	B+
495-512	83-85	B
477-494	80-82	B-
453-476	76-79	C+
435-452	73-75	C
417-434	70-72	C-
393-416	66-69	D+
357-392	60-65	D
356 or less	<59	F

Students Responsibilities: The student is expected to attend all lectures and laboratories, take notes, read the assignments, and achieve a cumulative score of 75% or greater on the exams. In the event of difficulty, it is the students' responsibility to seek help. This course requires as many hours outside the class in study and review as they are in class and lab.

Classroom Etiquette: Cell phones are only for **emergency**. There will be no texting or music or calls during class or labs. Language and dress are expected to be. I expect only one person to speak, and that is me, unless, there are questions or discussion pertaining to the material. Labs will require appropriate language, dress, actions, and behavior. No throwing specimens or instruments.

Academic Honesty: Do not remove any exam materials from the class or labs. Do not copy or remove exam material. No cheating allowed. The University expects that students and faculty alike maintain the highest standards of academic honesty. From the code of policies and procedures for students at Utah State University, Article V, Section E: Section 3, Violations of University Standards.

1. Acts of academic dishonesty.
 - A. Cheating includes intentionally: (1) using or attempting to use or providing others with any unauthorized assistance in taking quizzes, tests, examinations, or in any other academic exercise or activity; (2) depending upon the aid of sources beyond those authorized by the instructor in writing papers, preparing reports, solving problems, or carrying out other assignments; (3) substituting for another student, or permitting another student to substitute for oneself, in taking an examination or preparing academic work; (4) acquiring tests or other academic material belonging to a faculty member, staff member, or another student without express permission; and (5) engaging in any form of research fraud.
 - B. Falsification includes the intentional and unauthorized altering or inventing of any information or citation in an academic exercise or activity.

Withdrawals and incomplete grades: Incomplete grades are only given for conditions beyond the students control and not due to poor performance. Students who receive a incomplete must keep the scores they earned up until they leave the class. At a later date they are only allowed to complete the quizzes and exams that remained unfinished.

Students with Disabilities: Students with physical, sensory, emotional or medical impairments may be eligible for reasonable accommodations in accordance with the Americans with Disabilities Act and Section 504 of the Rehabilitation Act of 1973. All accommodations are coordinated through the Disability Resource Center (DRC) toll free at 1-800-259-2966. Alternate format materials (Braille, large print, or audio diskettes) are available with advance notice through the disability resource center.

COVID-19 Classroom Protocols

In order to continue to provide various forms of face-to-face instruction at USU, and to limit the spread of COVID-19 during the pandemic, students are asked to follow certain classroom protocols during the fall 2020 semester. These protocols are based on CDC,

state, and local health department guidelines and requirements are in place not only for your safety but also the safety of the entire campus community.

- Face coverings are required in all classrooms and teaching laboratories. Students will not be permitted to remain in class without a face covering, as per University Policy 20T.3. Students that do not adhere to the face covering policy will be referred to the Office of Vice President for Student Affairs for a possible violation of the Student Code of Conduct. There may be individual medical circumstances that prevent some students from using face coverings. If you require this exemption, contact the Disability Resource Center prior to the start of classes to investigate alternative instruction. These circumstances will be rare, but if they do exist, we ask that everyone be respectful.
- Follow faculty instructions regarding social distancing and entering/exiting classrooms.
- Stay home when you are sick, however mild your symptoms.
- Wash your hands frequently with soap and water.

Biology 2060 – Elementary Microbiology
Schedule of Classes, Fall 2017

Week	Day	Subject	Reading in Text
1	Tue, Jan 19	Course Introduction	iv-xii
	Tue, Jan 19	Introduction to Microbes	Chapter 1
	Lab Tuesday	Lab safety #1 use of microscope	Lab safety Lab 1
	Thu, Jan 21	Tools of the Laboratory	Chapter 2
2	Lab Thursday	#6 fungi prepared slides	Labs #6
	Tue Jan 26	Bacteria and Archea	Chapter 3
	Tue lab	Finish and turn in #1, #6 Start #2 specimen handling #3 streak plate technique	#1, #6 Labs #2, #3
	Thur Jan 28	Eukaryotic cells and Microorganisms	Chapter 4
3	Thur lab	Finish #2, #3 Start #5, #7	#17, #18 #5, #7
	Tue, Feb 2	Viral Structure and Life Cycles	Chapter 5
	Tue Lab	Start urine lab, lab #19	Labs #5, #7

		Finish #5, #7	
	Thu, Feb 4	Microbial Nutrition and Growth	Chapter 6
		Microbial Nutrition and Growth	Chapter 6
	Thur lab	Continue #5, #7	Labs #5, #7
4	Mon, Feb 8	EXAM #1 Testing Center	Chapters 1, 2, 3, 4
4	Tue, Feb 9	Last Day to Drop Without Notation on Transcript!	
		Microbial Metabolism	Chapter 7
	Tues lab	Start # 8, #9 simple stain negative stain	Labs #8, #9
	Thu, Feb 11	Microbial Metabolism	Chapter 7
	Thur lab	Lab Quiz #1 Finish Labs #8, #9	#1 Lab Quiz #1 Labs 1,2,3,5,6,7,8,9,19, urine lab
5	Tue, Feb 16	Microbial Genetics	Chapter 8
	Tue lab	Labs #10 capsule stain #11 gram stain	Labs #10, #11
	Thur, Feb 18	Microbial Genetics	Chapter 8
	Thur lab	Finish #10, #11, Start 13	Turn in prior labs, start 13
6	Mon, Feb 22	EXAM #2 testing center	Chapter 5, 6, 7, 8
	Tue, Feb 23	Physical and Chemical controls	Chapter 9
	Tue lab	Start Labs #14, #15	Labs #14, #15
	Thu, Feb 25	Antimicrobial Treatment	Chapter 10
	Thur lab	Finish #14, #15 Start #16, #17	Start #16, 17
7	Tue, Mar 2	Antimicrobial Treatment Draft due to writing center this week	Chapter 10
	Tue lab	Need letter from writing center Start labs #20, 25	Labs #20, # 25
	Thu, Mar 4	Interactions Between Microbes and Humans.	Chapter 11
	Thur lab	LAB QUIZ #2 Finish #20, #25	Labs 10,11,13,14,15,16,17

			Finish #20, #25
8	Tue, Mar 9	Spanish Flu video	Youtube
	Tues lab	#21, #22 Oxidase, Catalase	Labs #21, #22
	Thur, Mar11	Host Defenses	Chapter 12
	Thur. Lab	Start #42, #43, #46	#42, #43, #46
9	Mon, Mar 15	EXAM #3 testing center	Chapters 9, 10, 11, video
	Tue, Mar 16	Host Defenses	Chapter 13
	Tue lab	Finish #42,43,46	Labs 42, 43, 46
	Thu, Mar 18	Specific Host Defenses	Chapter 13
	Thur lab		
11	Tue, Mar 23	Disorders in Immunity	Chapter 14
	Tue Lab	Lab #34, #45	Labs #34, #45
	Thu, Mar 25	Diagnosing Infections	Chapter 15
	Thur lab	Finish #34,45,	
	Should be	working on finishing up your papers	and presentations now
12	Tue, Mar 27		
	Tue lab	Start Labs #48, #49	Labs #48, #49
	Thu, Mar 29	Microbial Diseases of the Skin and Eyes	Chapter 16
		Last Day to Drop With a “WF” on Transcript	
	Thur lab	Finish labs #48, #49	
13	Mon, Apr 5	EXAM #4 testing center	Chapters 12,13,14,15
	Tue, Apr 6	Microbial Diseases of the Nervous System	Chapter 17
		Lab Quiz #3	#20,21,22,25,34,42,43,45,46,48,49
	Thu, Apr 8	Microbial Diseases of the GI system	Chapter 20
		Student presentations	
14	Tue, Apr 13	Microbial Diseases of the Cardiovascular and Lymphatic Systems Student presentations on disease	Chapter 18

	Written	Scientific papers are due!!!!!! No labs	
	Thur, Apr 15	Microbial Diseases of the Urinary and Reproductive Systems	Chapter 21
15	Tue, Apr 20	Microbial Diseases of the Respiratory System	Chapter 19
	Lab	Student presentations on disease	
	Thur Apr 22		
16	Frid Apr 30	Comprehensive Final Exam Chapters 16-21	Chapters 16-21
