

2020 Department of Biology Awards

RICHARD J. AND MARION A. SHAW SCHOLARSHIP

Logan Sillitoe, Biology

My name is Logan Sillitoe. As a second-year student I have loved being an Aggie. I am a 4.0 student and have big dreams of becoming an oral surgeon. I've been able to take part in the pre-dental club on campus. I've also been able to volunteer with the Resilient group started by students here on USU Logan campus. The group exists to help Elementary to Middle School aged youth who may be having a hard family life. We help teach them valuable life skills after school. The group also exists simply to support these kids and be a friend that they might need. My hobbies include; spending time with my wife, learning new things, and running along with almost all sports. I have a large academic goal of being a valedictorian in the class of 2022. I know this is a large goal, but I also know anything is possible if I put my mind to it. As stated, before it's a life goal of mine to become an oral surgeon and help the community in that way by first being accepted into a prestigious dental school, but first and foremost, my greatest life goal is to be a successful husband and someday a father. My wife and I love USU and the future excites us. Go Aggies!
