02/23/2018

James Withers and Diane Alston

James Withers is studying the Brown Marmorated Stink Bug under the direction Dr. Diane Alston. The insect is an invasive species from eastern Asia that is causing a lot of havoc among Utah growers and property owners. Withers will be presenting his findings about the Brown Marmorated Stink Bug at 2018 Undergraduate Research Day on Feb. 28 on Utah's Capitol Hill. Read the full article by Mary-Ann Muffoletto.
