Hansen Life Sciences
Retreat 2019

10/04/2019

Hansen Life Sciences Retreat 2019 was attended by over 70 USU Scholars

The retreat honors the memory of renowned biochemist R. Gaurth Hansen, (1920-2002), a gifted scientist, teacher and administrator, who spent much of his career enriching Utah State University. A Cache Valley, Utah native, Hansen began his undergraduate studies at Utah State, before transferring to the University of Wisconsin, where he completed bachelor’s, master’s and doctoral degrees.

Hansen joined USU’s faculty as an academic vice president in 1968, and was soon promoted to provost. His efforts contributed to a twenty-fold increase in the university’s research budget. In addition to his administrative endeavors, Hansen published more than 100 peer-reviewed articles in professional journals and he received many prestigious national accolades. He was named USU Distinguished Professor Emeritus in 1985 and retired from Utah State in 1994.

The Hansen Life Sciences Retreat is financially supported by Hansen’s family.
