USU alumna Alexandra Lish, who worked in the Dr. Frank Messina Lab as a USU undergraduate, is among nine Aggies named 2022 National Science Foundation Graduate Research Fellows. Seven other USU scholars received honorable mention in the competitive STEM graduate program search.

“NSF Graduate Research Fellowships are the nation’s most prestigious graduate awards in science and engineering,” says USU President Noelle E. Cockett. “We applaud the accomplishments of these young researchers. Their NSF recognition is a testament to the outstanding quality of USU’s academic and research programs, as well as the high caliber of our students and faculty.”
