

Leila Schultz Receives Utah Native Plant Society Lifetime Achievement Award

03/09/2021

Leila Schultz

In addition to having discovered 20 different plant species and having over 11,000 plant collections now residing in herbaria some of Leila's other achievements are:

- Through her years Leila has discovered and described numerous species and has worked significantly in defining and describing many members of the genus *Artemisia*.
- In fact, she is considered by me and many others as *THE* authority on the taxonomy of sagebrush (*Artemisia*)
- She has worked on a number of large-scale interdisciplinary projects to document biodiversity in Utah
- She has become an authority on the geography of the Utah flora (Digital Atlas of Utah Plants)
- And she had contributed Numerous treatments for Flora of North America (<http://fna.org>)
